Closed removable thread vascular anastomosis stent (Lasheen Vascular Stent)

Published On: August 08, 2019 | Pages: 071 - 073

Author(s): Ahmed E Lasheen*

Background: Vascular anastomosis is a most common and important part of many reconstructive transplant procedures. Venous anastomosis can be done by using coupling devices. ...
Aim: People living in the countryside are less to have access to health care than those living in the city center. In addition to this, when migrants are added, it becomes more difficult to use health services. Although 20% of the US population lives in rural areas, only 9% of physicians work in these areas, and general surgeons seem to be inadequate in small ru ...
Peripheral facial paralysis causes asymmetry of the face affecting the upper and lower territories. Its management requires the completion of an initial clinical assessment in order to specify the topography, the severity of the involvement, the etiological nature and the possible complications. The knowledge and the mastery of the anatomo-physio-pathological bases ...
