Closed removable thread vascular anastomosis stent (Lasheen Vascular Stent)

Published On: August 08, 2019 | Pages: 071 - 073

Author(s): Ahmed E Lasheen*

Background: Vascular anastomosis is a most common and important part of many reconstructive transplant procedures. Venous anastomosis can be done by using coupling devices. ...

Internal urethral stent (Lasheen urethral stent) for hypospadias repair

Published On: August 08, 2019 | Pages: 068 - 070

Author(s): Ahmed E Lasheen*

Background: Hypospadias is a relatively common congenital defect of the male external genitalia. There is much controversy about using of the urethral stent with hypospadias repair. Our study offers new urethral stent (Lasheen urethral stent) to facilitate repair procedure, more comfortable, and improve outcome. ...

General surgery under limited conditions on the Syrian border

Published On: August 05, 2019 | Pages: 066 - 067

Author(s): Mustafa Senturk*
Aim: People living in the countryside are less likely to have access to health care than those living in the city center. In addition to this, when migrants are added, it becomes more difficult to use health services. Although 20% of the US population lives in rural areas, only 9% of physicians work in these areas, and general surgeons seem to be inadequate in small rural areas.

Distal foot reconstruction using distally based first web flap: A case series

Published On: July 31, 2019 | Pages: 061 - 065

Author(s): Ram Mohan, Naveen Kumar*, Manoj K Jha, Umesh N and Anchit Kumar

Background: The reconstruction of distal foot for various defects or contractures mainly over or near the toes has always been a difficult task. A flap distally based on first web space is dependent upon a perforator arising from the distal communicating artery between the first dorsal and plantar metatarsal arteries, can be used for the coverage of the toe ...

Antiemetic prescribing patterns for post-operative surgical patients

Published On: July 11, 2019 | Pages: 051 - 055

Author(s): Van N Tran1*, Brennan J Fitzpatrick1, Stefanie N Edwards2, Emily J Ferraro2, Federica Marafioti2, Thi Nguyen2, Alia Rafhi2, On Na Lam2 and Vincent Chan2

Background: Post-operative nausea and vomiting is a common occurrence amongst surgical patients. Anecdotal reports suggest antiemetic prescribing patterns to be an area for improvement. Aim: To report the most commonly prescribed antiemetic agents in a major tertiary teaching hospital in Australia; and to assess medication dosage and compared to the current natio ...

Peripheral facial paralysis
Peripheral facial paralysis causes asymmetry of the face affecting the upper and lower territories. Its management requires the completion of an initial clinical assessment in order to specify the topography, the severity of the involvement, the etiological nature and the possible complications. The knowledge and the mastery of the anatomo-physio-pathological bases ...
