### IMS 4112 and VLP of HBV as Th1 Adjuvants for a Recombinant Protein of HIV-1

**Published On:** December 17, 2016 | **Pages:** 026 - 035

**Author(s):** Ingrid Rodríguez-Alonso, Daymir García, Emma Brown, Stephane Ascarateil and Enrique Iglesias*

**Background:** Current thinking suggests that vaccination approaches against the HIV-1 should be directed to elicit a Th1 cell-mediated immunity, neutralizing antibodies and/or ADCC mediating antibody responses. ...

**DOI:** 10.17352/jvi.000018

### Pathogenicity of Duck-Originated H9N2 Influenza Viruses on Chickens

**Published On:** November 14, 2016 | **Pages:** 023 - 025

**Author(s):** Kunkun Zhao, Chunxia Jin, Yuxin Huang, Haiyang Zhang, Jingjing Xue, Hui Tian, Yue Yuan, Xiangdong Li, Wujie Liu* and Kegong Tian*

**Background:** The spreading of H9N2 avian influenza viruses in poultry in Eurasia and Africa accompanied with the great economic losses to poultry industry in past decades has attracted the great attention of whole world. Domestic ducks play a critical role in the ecology of avian influenza viruses. ...

### Efficacy of a Recombinant Genotype VII Vaccine against Challenge with Velogenic Newcastle Disease Virus

**Published On:** October 25, 2016 | **Pages:** 019 - 022
Author(s): Yi Cheng, Dongbei Sheng, Xiangdong Li, Sumei Hong, Lixia Guo, Shasha Zhao, Yue Yuan, Jingjing Xue, Hui Tian, Yipin Ren, Wujie Liu* and Kegong Tian*

Background: Newcastle disease virus (NDV) genotype VII has become the dominant genotype in China. However, NDV genotype II was used to make current commercial NDV vaccines. The mismatch of genotypes between circulating and vaccine strains of viruses may compromise the efficacy of vaccines. ...

Prospects for the Development of a Dengue Vaccine

Published On: August 10, 2016 | Pages: 015 - 018

Author(s): Usa Thisyakorn* and Chule Thisyakorn

Dengue is a mosquito-borne viral disease which is currently an important and rapid growing health problem across the globe. Four closely related dengue serotypes cause the disease, which ranges from asymptomatic infection to undifferentiated fever, dengue fever (DF), and dengue hemorrhagic fever (DHF). ...

Immunity against Pasteurella multocida in Animals Vaccinated with Inactivated Pasteurella multocida and Herbal Adjuvant 'DIP-HIP'

Published On: July 16, 2016 | Pages: 010 - 014

Author(s): Himanshi Tanwar, Anand Prakash Yadav, Brijbhushan, Shweta, Shashi Bala Singh, and Lilly Gajju*

Background: Haemorrhagic septicaemia (HS) is acute, highly contagious form of disease of water buffalo, cattle, and bison caused by Pasteurella multocida (PM). ...

Supercritical Carbon Dioxide Extract of Seabuckthorn Leaves Enhances Rabies Virus Neutralizing Antibody Titers and CTL Response in Swiss Albino Mice
Introduction: Rabies is a viral disease that causes nearly thousands of death globally per year. Vaccination against rabies generates virus neutralizing antibodies and is the most successful and cost effective method of preventing the disease. ...
