Study of Bacillus megaterium potential application for high metal content residues biotreatment

Published On: August 01, 2018 | Pages: 004 - 008

Author(s): Andrea M Rivas-Castillo, Yessica Mejia-Escobedo, and Norma G Rojas-Avelizapa*
Previous work has demonstrated that Bacillus megaterium, besides showing an elevated resistance to heavy metals, possesses the ability to remove metals like Ni, Hg, and V from liquid media. Notably, Ni represents a highly valuable metal commonly found in industrial wastes, whose removal from environment is crucial, as it is considered a dangerous toxic metal. ...
