**Arsenic Pollution Measured with an online Monitoring System using Daphnia**

Published On: May 12, 2017 | Pages: 027 - 034

Author(s): Donat-P Häder* and Gilmar S Erzinger

Arsenic is a common pollutant in many water reservoirs around the world and is the cause of human mortality in many countries. The microcrustacean Daphnia can be cultured easily and is sensitive to many toxic substances including As. ...

**Metal (Loid)s in Farmland Soils and Strategies to Reduce Bioavailability**

Published On: April 18, 2017 | Pages: 009 - 024

Author(s): Fayiga AO*, Nwoke OC,

High concentrations of heavy metal (loid)s (HMs) in farmland soils reduces crop yield and contaminates the food chain.
Exposure to HMs in the diet results in several adverse health effects such as cancer, reproductive health problems and cardiovascular diseases.

**Antioxidants and Ageing**

Published On: May 12, 2017 | Pages: 025 - 026

Author(s): Biswaranjan Paial*, Tallat Jahan, Sthiti pragyan Priyadarshini and Ankita Mohanty

Antioxidants are the molecules that reduce the chance of ageing by diminishing or maintaining the level of oxidants with or without free radical activity. Therefore, to many people, “antioxidants” and “anti-aging” go hand-in-hand.

**Anthropogenic Effects on Climate**

Published On: May 24, 2017 | Pages: 035 - 037

Author(s): Khalidullin Oleg*

It remains very little until the complete destruction of the Earth. Man, like an unreasonable child, without knowing danger, destroys his cradle. Every living creature, every blade of grass on the planet has its purpose.
