Prevalence of Serological Markers of TORCH Infections in Biliary Atresia and Other Neonatal Cholestatic Disorders

Published On: December 30, 2016 | Pages: 013 - 017

Author(s): Mostafa Mohamed Sira*, Ahmad Mohamed Sira, Ibrahim A Elhenawy and Fatma Omar Khalil
Background: Viral infections, congenitally or perinatally acquired, have been associated with neonatal cholestasis. Investigators have suggested a similar link to biliary atresia (BA). ...

The Relation between Demographic Factors, Family History, Concomitant Autoimmune Diseases and Glycemic Control in Children with Type 1 Diabetes, A Cross-Sectional Study

Published On: June 15, 2016 | Pages: 006 - 009

Author(s): Hossein Moravej*, Mahmood Goodarzi and Zohreh Karamizadeh
Supraventricular tachyarrhythmia (SVT) is the most common tachyarrhythmia in pediatric patients and accounts for more than 90% of pediatric arrhythmias. As many as 16 different mechanisms of pediatric SVT exist; we focused in this review article on the three most common groups of SVT mechanisms in pediatrics: atrioventricular re-entry tachyarrhythmia (AVRT), atriovent ...

**Isolated Conjugated Hyperbilirubinemia in Seriously Ill Children – Don’t Forget Sepsis!**

Background: Jaundice is frequently associated with extrahepatic systemic infections. The important causes include increased bilirubin levels due to hemolysis, hepatic dysfunction, reduced excretion and cholestasis. ...
