The dual mobility hip arthroplasty for hip fracture in Parkinson’s disease

Published On: June 29, 2020 | Pages: 032 - 035

Author(s): Ayman Abdelaziz Bassiony* and Saleh Gameel

Background: Patients with Parkinson’s disease are at increased risk for falls and associated hip fractures as a result of tremor, rigidity, and postural instability. The available literature is limited and conflicting regarding the optimal surgical treatment and risk for postoperative complications and mortality in this unique patient population. This study question th ...

Trauma Resuscitation Time at A Tertiary Care Hospital in Oman: A Retrospective Observational Study

Published On: June 12, 2020 | Pages: 028 - 031

Author(s): Maysa Al-Maawali, Salim Al Rawahi* and Hani Al-Qadhi

Introduction: Trauma is an important worldwide public-health problem. This study aims to evaluate the median trauma resuscitation time (TRT) at Sultan Qaboos University Hospital (SQUH), Oman, and to investigate the reasons for delay in trauma resuscitation. Documenting TRT can be utilized to assess areas of improvement for trauma team performance, ensuring a high-qual ...
