Mu-opioid receptor expression in multibacillary leprosy

Study of the µ opioid receptor in cutaneous ulcers of leishmaniasis and sporotrichosis according to the complaints of local pain

Deworming school children in Ethiopia: The importance of a comprehensive
Introduction: A quarter of the world's population, most commonly in developing countries like Ethiopia, are infected with intestinal parasites. School age children are the most affected segment of the population. The World Health Organization (WHO) recommends periodic deworming of all at-risk people living in endemic areas.
