Author(s): Didye Ruiz*, Carlos M Torres, Mayling Alvarez, Pedro A Martinez, Naifi Calzada, Lianna M Garcia and Maria G Guzman

Background: Zika Virus (ZIKV) is an emerging mosquito-transmitted flavivirus currently causing large epidemics and represents a global public health. Most ZIKV infections in humans are asymptomatic or mild with self-limiting clinical manifestations. Certainty, an available and sustainable surveillance for risk individual groups to ZIKV infection it is necessary and se ...

Henoch-Schonlein Purpura with multiple renal calculi with hydronephrosis-A Case Report

Published On: April 21, 2020 | Pages: 004 - 006

Author(s): Kriti Mohan*, Swathi Chacham, Ajay Bharti and Balram Ji Omar

Henoch-Scholein Purpura (HSP) is one of the most common vasculitic disorder of childhood and is characterised by the presence of nonthrombocytopenic purpura (and usually) palpable purpura, transient arthralgia (occasionally arthritis), abdominal symptoms and renal involvement. Here we are reporting a previously healthy adolescent male child who presented with skin, jo ...

Giant symptomatic uterine fibroid: A rare case in Enugu, South East Nigeria

Published On: March 05, 2020 | Pages: 001 - 003

Author(s): Henry C Nnaji*, Emmanuel O Udogu, Eric E Asimadu and Emeka F Nnakenyi

Giant uterine fibroids are rare benign smooth muscle neoplasms of the uterus. They are gynaecological problems found among women of reproductive age that negatively impacts their health. Uterine fibroids are described as giant when the fibroid tissues weigh more than 11.4kg. This type of benign disease poses a great management challenge. Generally uterine fibroids are ...
